

Customer: Defense
Information Systems
Agency (DISA)

Program: DoDNet

DoDNet is the new single service
network for support defense
agencies and field activities

DoDNet Services Contract Overview

- Prime is currently performing services for the Department of Defense (DOD), Defense Information Systems Agency's (DISA) requirement for the DISANet Operations Support (also known as Department of Defense Network Services) and has engaged TangoAlpha3 as a recruiting partner.
- Contract provides comprehensive delivery of commodity information technology (IT) services...
 - This service shall provide all required infrastructure, network operations and management, engineering and innovation, cybersecurity, support services, and technical refresh of DISA's new requirement to deliver DoDNet.
 - This network shall provide commodity IT functions to over 50,000 users at contiguous United States (CONUS) and Outside Continental United States (OCONUS) locations within the Fourth Estate (4E) Agencies and includes NIPRnet and SIPRnet connectivity.
- Open Positions: Network & Systems Engineers; Cable Technician

Network Engineer – Mid (3rd shift)

The **Network Engineer – Mid (11:30pm- 6:30am Shift)** provides critical skills as part of a team to operate, manage, troubleshoot, and resolve complex network issues and maintain a secure network. A thorough understanding of LAN/WAN integration, TCP/IP, switching, and routing is essential. The network engineer will also be expected to provide experience in deploying desktops, servers, cabling, switches, bridges, and routers to ensure end to end connectivity. This position may also support some system and server administration and desktop services as part of a larger team.
